

My name is Sergey. And my work demonstrates how people spoil the ocean. Here is the clear message and advocating not to spoil the oceans with plastic. Because, plastics pollution has a direct and deadly effect on wildlife. Thousands of seabirds and sea turtles, seals and other marine mammals are killed each year after ingesting plastic. Plastic never goes away, but animals go.

The work speaks itself. In the water we can see several varieties of sea animals. They symbolize the abundance of marine mammals. On the top of picture we can see human hand above the water which symbolizes us, I mean people, humanity, that pollute the oceans with plastic. And we must make people think.

I made my work with tempera than I scanned it and made the plastic garbage with my computer to make it more demonstrative. Size is approx. A4 (11.8 x 7.1), because I had to scan it, and I have scanner only for A4 size paper.
